Abstract— This document gives formatting instructions for authors preparing papers for publication in the said journal. The authors must follow the instructions given in the document for the papers to be published. You can use this document as both an instruction set and as a template into which you can type your own text.

This template preserves much of the standard LATEX interface so that authors can easily convert their standard LATEX article style files to the required style.

Keywords— Include at least 5 keywords or phrases

1. Introduction

When you submit your paper print it in one-column format, including figures, equations and tables. In addition, designate one author as the “corresponding author”. This is the author to whom proofs of the paper will be sent. Proofs are sent to the corresponding author only.

2. Page Size and Layout

Set your page as A4, width 210, height 297 and margins as follows:

- Left Margin 17.8 mm (0.67")
- Right Margin 14.3 mm (0.56)
- Top Margin – 17.8 mm (0.7")
- Bottom Margin – 17.8 mm (0.7")

3. Title and authors

The title of the paper is centred 17.8 mm (0.67") below the top of the page in 24 point font. Right below the title (separated by single line spacing) are the names of the authors. The font size for the authors is 11pt. Author affiliations shall be in 9 pt.

3.2 Body paragraphs

The main text for your paragraphs should be 10pt font. All body paragraphs (except the beginning of a section/sub-section) should have the first line indented about 3.6 mm (0.14").

3.2.1 Figures and Tables

Place illustrations (figures, tables, drawings, and photographs) throughout the paper at the places where they are first discussed in the text, rather than at the end of the paper. Number illustrations sequentially (but number tables separately). Place the illustration numbers and caption under the illustration in 10 pt font. Do not allow illustrations to extend into the margins. If your figure has two parts, include the labels “(a)” and “(b)”.

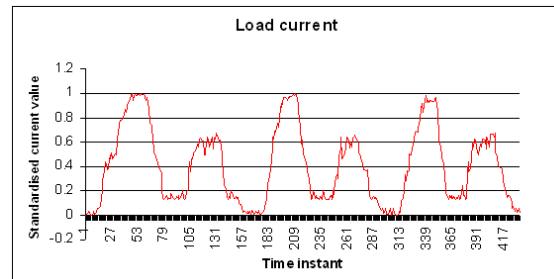

Figure 1. Testing data- load current (amperes)

3.2.2 Tables

Place table titles above the tables.

Table 1. Best results

Load time	Frequency	Total Cost
Seconds	Eight	None
Minutes	Nine	More

3.2.3 Sections headings

Section headings come in several varieties:

1. first level headings: **1. Heading 1**
2. Second level: **1.2. Heading 2**
3. third level: **1.2.3 Heading 3**
4. forth level: **(a) Heading 4**
5. fifth level: **(1) Heading 5**
6. sixth level: **(a) Heading 6**

3.2.4 References

Number citations consecutively in square brackets [1]. The sentence punctuation follows the brackets [2]. Multiple references [2], [3] are each numbered with separate brackets [1]–[3]. Please note that the references at the end of this document are in the preferred referencing style. Please ensure that the provided references are complete with all the details and also cited inside the manuscript (example: page numbers, year of publication, publisher's name etc.).

4. Equations

Equations should be typewritten whenever possible and the number placed in parentheses at the right margin. If you are using *Word*, use either the Microsoft Equation Editor or the *MathType* add-on (<http://www.mathtype.com>) for equations in your paper (Insert | Object | Create New | Microsoft Equation or MathType Equation). “Float over text” should not be selected.

Number equations consecutively with equation numbers in parentheses flush with the right margin, as in (1). First use the equation editor to create the equation. Then select the “Equation” markup style. Press the tab key and write the equation number in parentheses.

Reference to equations should use the form “Eq. (1)”

$$E = \sum_{p=1}^p \sum_{k=1}^k (\delta_{pk}^o)^2 \quad (1)$$

5. LATEX

If the author using LATEX interface for the paper, so that authors can easily convert their standard LATEX article style files to the required style. The file should look like this:

```
\documentclass{jcmlatex}
\def\IJLTSEvol{xx}
```

```
\def\IJLTSEno{x}
\def\IJLTSEyear{xxxx}
\setcounter{page}{1}
